

Arun Sai Porandla

Technical Specialist

porandla.arun9@gmail.com | +91 8500166773 | Hyderabad, IN

PROFESSIONAL SUMMARY

Network and Infrastructure Specialist with 9+ years of experience in enterprise IT infrastructure, system administration, cloud operations, and network support. Extensive hands-on experience supporting Cisco networking environments including switching, routing, VLANs, VPNs, wireless controllers (WLC), firewall administration, and enterprise connectivity troubleshooting. Skilled in AWS cloud operations, Microsoft 365 administration, Windows server management, security compliance, and SLA-driven incident management. Strong expertise in troubleshooting complex infrastructure and network issues, implementing change management processes, and supporting business-critical enterprise environments.

CERTIFICATIONS

- Cisco Certified Network Associate - **CSCO15002065**
- MTA: Networking Fundamentals - **Qz8k-FVpy**
- MTA: Windows Server Administration Fundamentals - **EFPH-DThd**
- MTA: Windows Operating System Fundamentals - **wEhWU-4SuP**
- Microsoft Certified Professional (MCP) - **40797C-AB1NBF**
- Introduction to Cybersecurity (Cisco Net Academy)

TECHNICAL SKILLS

- **Cloud & Infrastructure:** AWS EC2, S3, IAM, VPC | Azure Virtual Machines & Storage | Windows Server Administration | Linux Server Support | Active Directory Administration | Hyper-V Virtualization | Server Patching & Upgrades
- **Networking:** Cisco Switching & Routing | VLAN Configuration & Troubleshooting | VPN Support & Remote Connectivity | Cisco Wireless LAN Controller (WLC) | Cisco Meraki Dashboard Monitoring | LAN/WAN Support | TCP/IP | DNS | DHCP | NAT | Layer 2 & Layer 3 Troubleshooting | Network Monitoring & Incident Resolution | Firewall Administration (FMC, SOPHOS & Fortigate) | Cisco ISE Exposure | Wireless Network Troubleshooting
- **Microsoft Technologies:** Microsoft 365 Administration | Exchange Online | SharePoint Online | Microsoft Teams | Power Platform | Group Policy Management
- **Security & Compliance:** Endpoint Security | Antivirus / EDR Solutions | Vulnerability Remediation | Access Management | Security Compliance Monitoring
- **Tools & Operations:** Manage Engine | Atera | Git | ITIL Processes | Change Management | Incident Management | Basic PowerShell Scripting | Asset Management | Ticketing Systems
- **Collaboration & Support:** Cross-team coordination, 3rd-party/vendor engagement, and end-user technical support across enterprise environments.

ACADEMIC QUALIFICATIONS

- B. Tech (EEE) (JNT University), Telangana.

PROFESSIONAL EXPERIENCE

Employer	Designation	Duration
Zensar Technologies (Previously M3BI)	Technical Specialist	Jul' 2019 – Present
Vimbri Media Pvt Ltd	Sr. System Administrator	Sept' 2018 – Jul' 2019
Macro Tech	System Administrator	June' 2016 – Aug' 2018

Environment Scale

- Supported 1000+ enterprise users across infrastructure, networking, and Microsoft 365 & Windows Server environments.
- Managed and monitored 100+ network and Windows server devices across multiple business locations.
- Handled SLA-driven incident management and supported daily operational tickets within enterprise support environments.

Core Technical Responsibilities

Networking & Infrastructure

- Managed and supported enterprise network infrastructure consisting of routers, switches, wireless controllers, and firewall environments across multiple business locations.
- Maintained network availability and ensured minimal downtime by proactively monitoring infrastructure alerts, incidents, and performance metrics.
- Implemented VLAN segmentation, VPN connectivity, and access control policies to improve network security and operational efficiency.
- Performed root cause analysis for recurring network and infrastructure issues, reducing repeat incidents and improving service stability.
- Coordinated with ISP providers and third-party vendors for circuit troubleshooting, firewall changes, and connectivity escalations.
- Supported business-critical LAN/WAN environments while ensuring SLA compliance and timely incident resolution.

Cloud & Server Administration

- Administered AWS and Azure infrastructure resources, including virtual machines, storage, IAM policies, and cloud networking components.
- Managed server patching, upgrades, and maintenance activities across Windows and Linux environments with minimal business disruption.
- Supported Active Directory administration (Microsoft Windows server expert), including user provisioning, access management, GPO implementation, and account lifecycle management.
- Monitored server health, backup status, and infrastructure performance to ensure high availability of enterprise services.
- Managed Hyper-V virtualised environments and supported virtual machine deployment and resource optimisation.

Microsoft 365 & Collaboration

- Administered Microsoft 365 services, including Exchange Online, SharePoint Online, Teams, and user access management.
- Supported collaboration platform issues and implemented solutions to improve end-user productivity and communication services.
- Assisted in Microsoft Teams and SharePoint administration including permissions, troubleshooting, and policy configurations.

Security & Compliance

- Managed endpoint protection and security compliance activities, including antivirus management, EDR monitoring, and vulnerability remediation.
- Configured and maintained firewall security policies, NAT rules, VPN configurations, and web filtering policies in Sophos and FortiGate environments.
- Assisted in security audit preparation and compliance activities by maintaining system updates and access control standards.
- Monitored security alerts and coordinated remediation activities to reduce infrastructure vulnerabilities and operational risks.

Operations & Automation

- Managed incident, service request, and change management activities following ITIL processes and enterprise SLA standards.
- Developed basic PowerShell scripts and automation tasks to reduce manual administrative efforts and improve operational efficiency.
- Maintained technical documentation, SOPs, and knowledge base articles to support operational continuity and team collaboration.
- Utilised infrastructure monitoring and remote management tools, including ManageEngine and Atera, for proactive support operations.

Infrastructure & Network Projects

- Implemented and managed Cisco Wireless LAN Controller (WLC) configurations including SSID creation, AP onboarding, wireless policy management, and enterprise wireless troubleshooting.
- Supported Layer 3 network implementation activities including VLAN segmentation, inter-VLAN routing, IP addressing, and enterprise network optimization across business environments.
- Configured and implemented firewall policies, NAT rules, VPN tunnels, and security access controls in Sophos and FortiGate firewall environments to enhance network security and remote connectivity.
- Participated in network infrastructure enhancement and migration activities involving switch configuration, wireless optimization, and firewall rule implementation with minimal business disruption.

Personal Attributes

- Strong analytical and troubleshooting skills
 - Excellent communication and team collaboration.
 - Ability to work in SLA-driven enterprise environments.
 - Strong incident management and problem-solving capabilities
 - Quick learner with adaptability to emerging technologies.
-
